

Certifications

Our products:

We sell young plants that have been produced in the Zillmer nursery in Germany, D-31600 Uchte. The mother plants grow also at this location.

Our production process:

The entire production process takes place at one location in Germany. All of the process steps and working facilities are subject to German and European law. From crop protection to the regulation of working hours.

Certificates for certifications:

We can serve every customer an individually certify that for all of the young plant deliveries from our nursery the German guidelines were complied with during production. Thus the European requirements have been implemented in the production process. This makes it possible for certified companies from across Europe to buy young plants from us. (e.g. nurseries with GLOBALG.A.P. certification)

AGOZ:

We are enrolled and registered for the AGOZ procedure at the Lower Saxony Chamber of Agriculture under the company number: D-NS1-21-120
For all plants the following applies: EC quality, standard material.
We issue plant passports for every delivery of plants subject to a passport (marked with a # on the delivery note).

Contact and conversations:

You are more than welcome to visit us in Uchte and check out the way we work, including our efficiency. Please call us to arrange an appointment.
